

Image 1

You are a space explorer aboard the the latest and greatest space exploration vessel. Suddenly, your ship's navigation systems malfunction and sends you hurtling through a wormhole. After a few moments of chaos, you find yourself alone and stranded on an unknown planet. As you survey your surroundings, you notice two distinct areas in your vicinity.

Option 1: Head towards the sprawling city in the distance

Option 2: Venture towards the glowing cave in the nearby mountainside.

[Image 2](#)

You begin walking towards the distant city, hoping to find some help or answers about where you are. As you get closer, you notice that the structures seem abandoned and covered in layers of dust and debris. Suddenly, a group of humanoid creatures emerge from the shadows and start approaching you.

Option 1: Attempt to communicate with them

Option 2: Draw your weapon and prepare for a fight.

[Image 3](#)

You take a step forward and put your hands up to show that you mean no harm. The creatures stop their advance and seem to be studying you. After a moment, one of them steps forward and starts to make some guttural noises that you can't understand.

- Option 1: Try to communicate with some basic hand gestures
- Option 2: Use your translator device to attempt to talk to them.

[Image 4](#)

You use some basic hand gestures like waving and pointing to indicate that you come in peace. The creatures seem to understand and they begin to make some gestures of their own. After a back and forth exchange of gestures, you finally manage to convey to them that you are lost and need help.

Option 1: Follow the creatures to their settlement

Option 2: Keep your guard up and refuse their help.

[Image 5](#)

You decide to follow the creatures to their settlement in hopes of finding some answers about where you are. They lead you through the abandoned city to a hidden underground bunker. Inside, you discover a group of survivors who have been living on this planet for generations.

- Option 1: Ask them how you can find a way back to your ship
- Option 2: Offer to help them with their struggles on the planet.

[Image 6](#)

The survivors explain that they've been struggling to deal with numerous dangers on this planet like giant creatures, deadly storms, and malfunctioning technology. They express gratitude for your offer to help and explain that their greatest need right now is a functioning power source to power their life-sustaining systems.

Option 1: Offer to use your technical skills to try to fix their power source

Option 2: Offer to go out and search for a new power source for them.

[Image 7](#)

You take a look at their power source and start using your technical skills to fix it. After a few hours of tinkering, you manage to get it back online. The survivors are overjoyed and grateful for your help.

Option 1: Ask them again how you can find a way back to your ship

Option 2: Help them with other issues they have.

Image 8

The survivors mention that there are several more problems they could use your help with, such as repairing their atmospheric filters, reinforcing their defenses against the giant creatures, and finding new sources of food and water.

Option 1: Agree to help with all their problems.

Option 2: Offer to help with some of their problems but not all of them.

[Image 9](#)

You agree to help the survivors with all their problems. You work tirelessly with them over the next few days, fixing their atmospheric filters, reinforcing their defenses, and discovering new sources of food and water. The survivors are grateful to you and consider you a hero among their people.

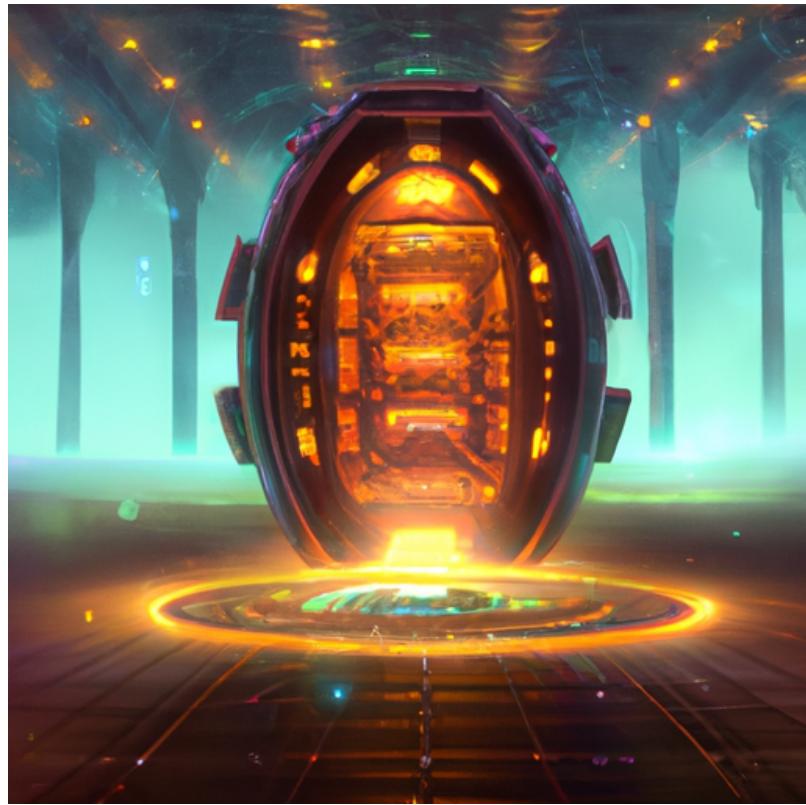

- Option 1: Ask them again if they know how you can find a way back to your ship
- Option 2: Decide to stay with the survivors and help build a new civilization on this planet.

Image 10

You ask the survivors again if they know how you can find a way back to your ship. They tell you that they have no real knowledge of space travel or how wormholes work, but they may have a device that could help you.

- Option 1: Agree to check out the device and see if it can help you get back to your ship.
- Option 2: Decide to stay with the survivors and help build a new civilization on this planet.

[Image 11](#)

You agree to check out the device and see if it can help you get back to your ship. They lead you to a hidden chamber where they keep their most precious discoveries. Inside, you find a strange device that seems to emit a powerful energy field.

Option 1: Ask the survivors how to use the device

Option 2: Experiment with the device on your own to see if you can figure it out.

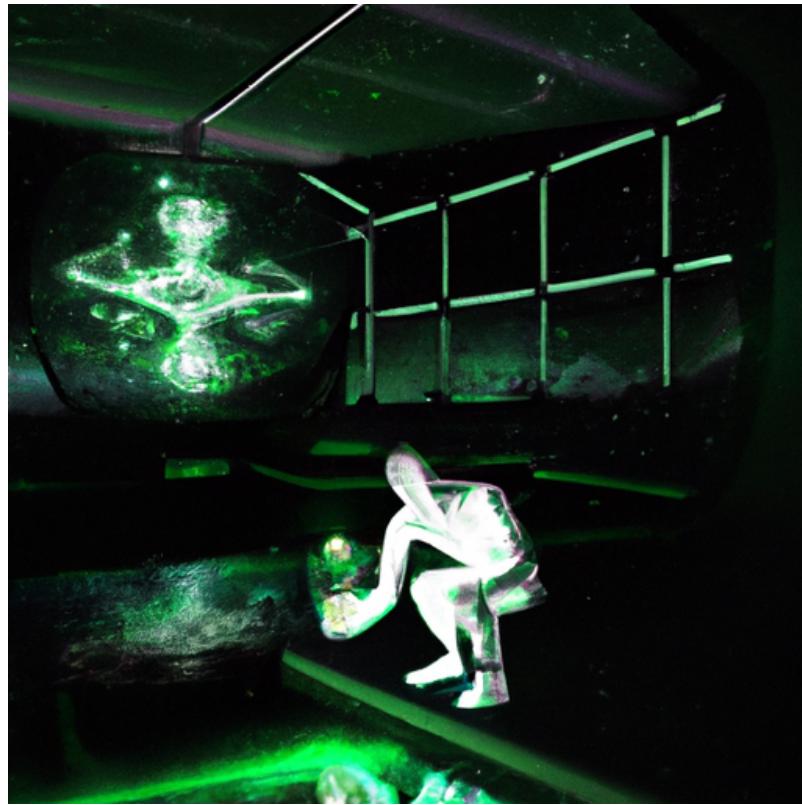

[Image 12](#)

You ask the survivors how to use the device. They explain that it is a teleportation device that is powered by the energy of the planet. They warn you that it is dangerous to use as it can sometimes malfunction and send you to an unknown location.

Option 1: Decide to use the device and hope for the best.

Option 2: Decide not to use the device and continue to search for another way back to your ship.

[Image 13](#)

You decide to take the risk and use the device, hoping that it will take you back to your ship. You activate the device and suddenly you feel your body being disintegrated into energy. After a few moments, you start to feel your body being re-formed and you find yourself back on your ship, in the exact same spot where you left.

Option 1: Check your ship's systems to see if they're fully operational.

Option 2: Try to figure out how to locate another wormhole to continue exploring.

Image 14

You check your ship's systems and realize that they are fully operational. You let out a sigh of relief, feeling that you have dodged a bullet. However, you notice that your ship's navigation system seems completely different than before.

Option 1: Take time to study the navigation system to figure out what's changed.

Option 2: Decide to take off into space and see where the new navigation system takes you.

[Image 15](#)

You take some time to study the new navigation system to figure out what's changed. You realize that the system has a completely different interface and seems to have a lot more information about the universe than the old system did.

- Option 1: Decide to explore some nearby stars to test the new system.
- Option 2: Try to locate Earth and set a course back home.

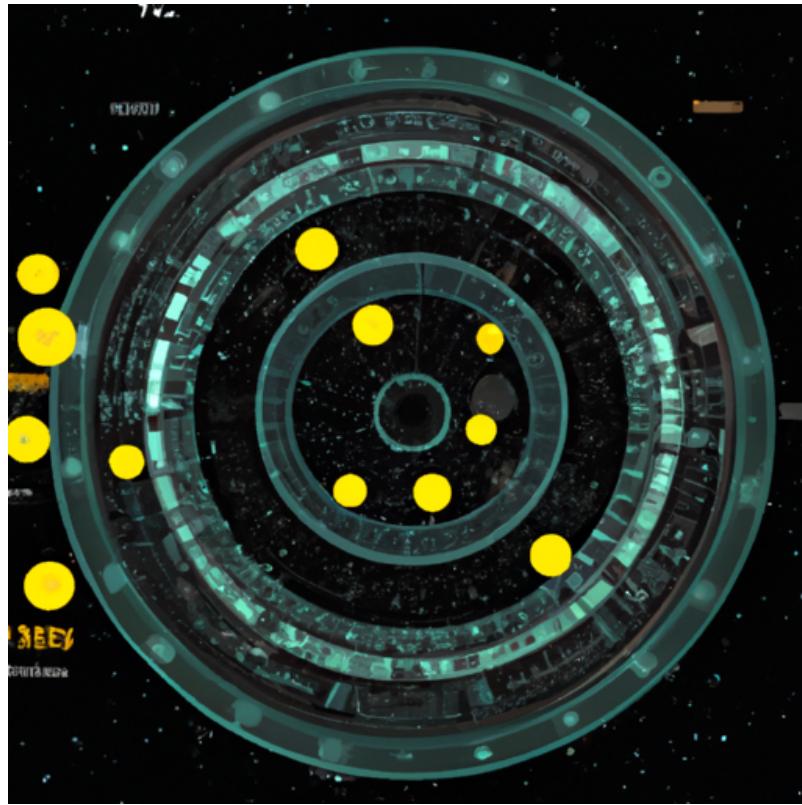

Image 16

You decide to explore some nearby stars to test the new system. After a few systems, you realize that the new system is far more accurate and fast than the previous one. You also notice something strange about some of the stars you are exploring.

- Option 1: Take a closer look at the strange stars.
- Option 2: Continue exploring other stars.

[Image 17](#)

You decide to take a closer look at the strange stars. As you approach the star, you notice that it seems surrounded by a strange energy field.

Option 1: Investigate the energy field to see if it poses a threat.

Option 2: Decide it's too risky and move on to the next system.

[Image 18](#)

You investigate the energy field to see if it poses a threat. As you get closer, you suddenly feel your ship start to shake and vibrate. You try to gain control of your ship, but it feels like something is pulling you towards the energy field.

Option 1: Try to use your ship's engines to fly away from the energy field.

Option 2: Shut down your ship's systems and hope the energy field will let go of your ship.

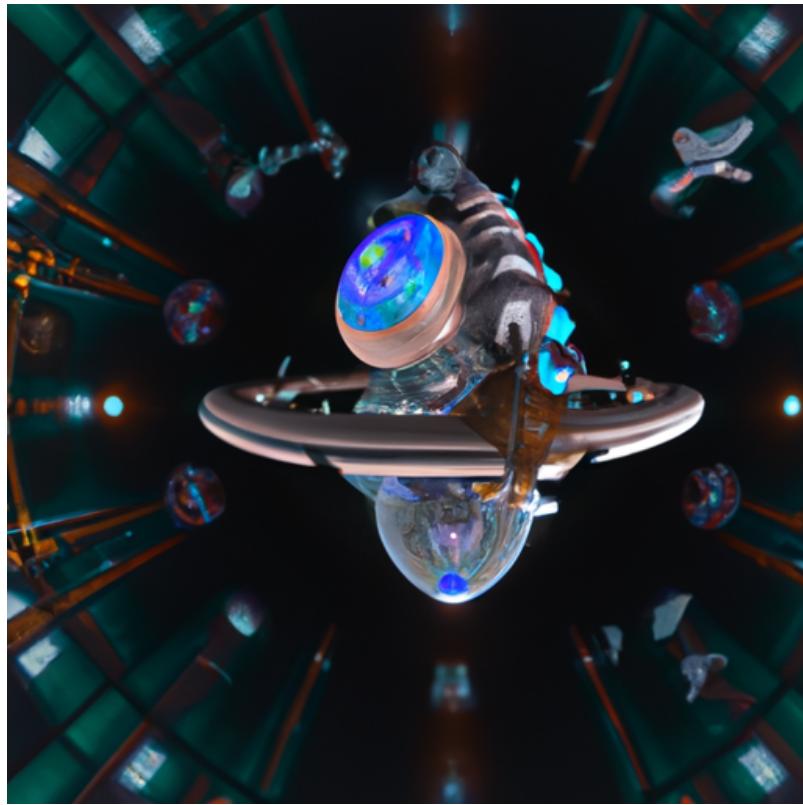

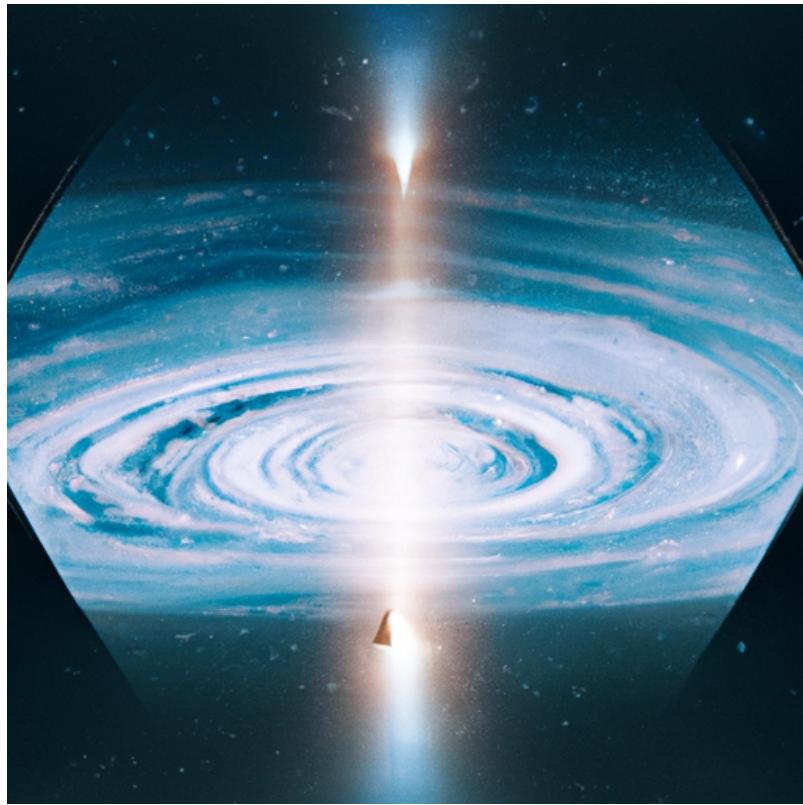

Image 19

You try to use your ship's engines to fly away from the energy field, but they seem to have no effect. You then quickly realize that the energy field is some kind of powerful force that is beyond your comprehension.

Option 1: Keep trying to use your ship's systems to break free.

Option 2: Surrender to the energy field's power and see where it takes you.

[Image 20](#)

You decide to surrender to the energy field's power and see where it takes you. Your ship gets pulled into the energy field and you feel your body being transformed into pure energy. After a few moments, you find yourself in another part of the universe, in a completely different quadrant than where you were before.

Option 1: Try to figure out where you are and what's around you.

Option 2: Activate your ship's communication systems and try to make contact with anyone nearby.

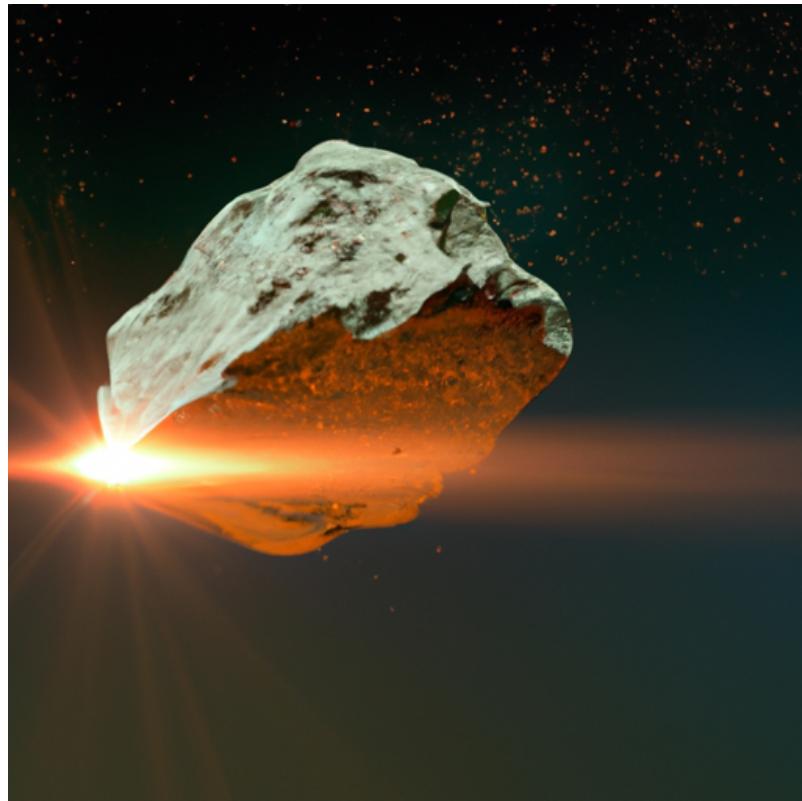

[Image 21](#)

You activate your ship's communication systems and try to make contact with anyone nearby. To your surprise, you get a response from a nearby alien race.

Option 1: Attempt to communicate with the alien race to learn more about them.

Option 2: Decide not to make contact with the alien race and continue exploring.

[Image 22](#)

You decide not to make contact with the alien race and continue exploring. As you maneuver through the vast expanse of space, you suddenly come across a massive asteroid that seems to be emitting a strange energy signature.

- Option 1: Investigate the energy signature to see what it is.
- Option 2: Ignore the asteroid and continue your exploration.

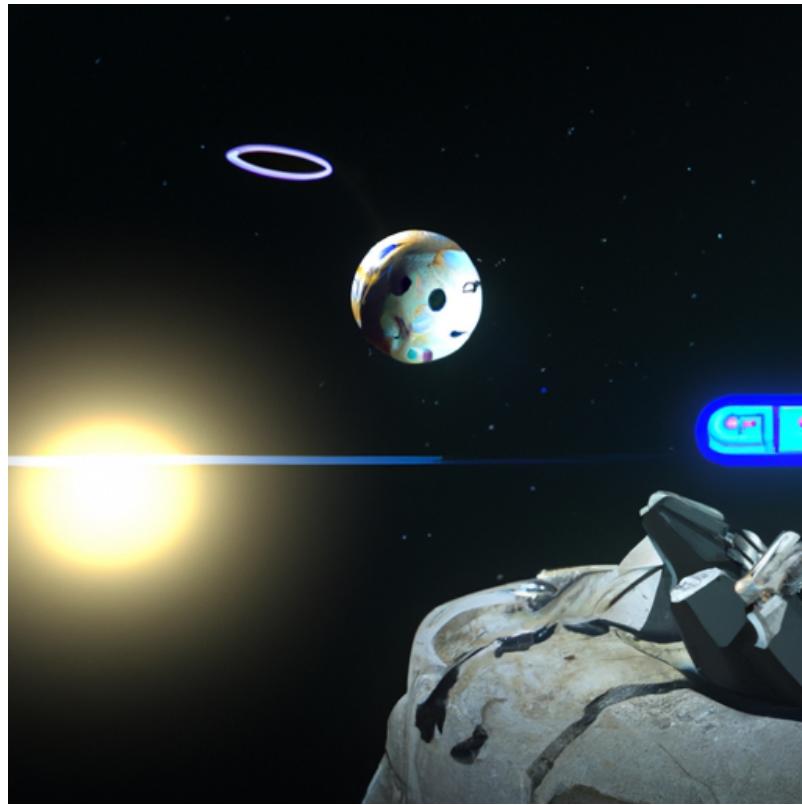

Image 23

You decide to ignore the asteroid and continue your exploration. As you continue on your journey, you suddenly receive a distress signal from a nearby ship.

Option 1: Respond to the distress signal and offer to help.

Option 2: Ignore the distress signal and continue your exploration.
